

Freshmen Orientation 2017

How'd we do?

Why are we here?

Data is important.

We haven't been sharing enough.

We made many changes this year.

We need to assess what happens next.

Goals for Today

Inform you of positive data trends.

Identify gaps in the transition from orientation week to the first semester.

Share suggestions on addressing aforementioned gaps.

Use data to discuss ideas for coming years.

Participation Profile

1,059 students registered for orientation

160 EOP students participated

153 Klamath Connection and Stars to Rocks students partially participated

1,288 total students participated in the program

84 fall athletes did not participate in orientation

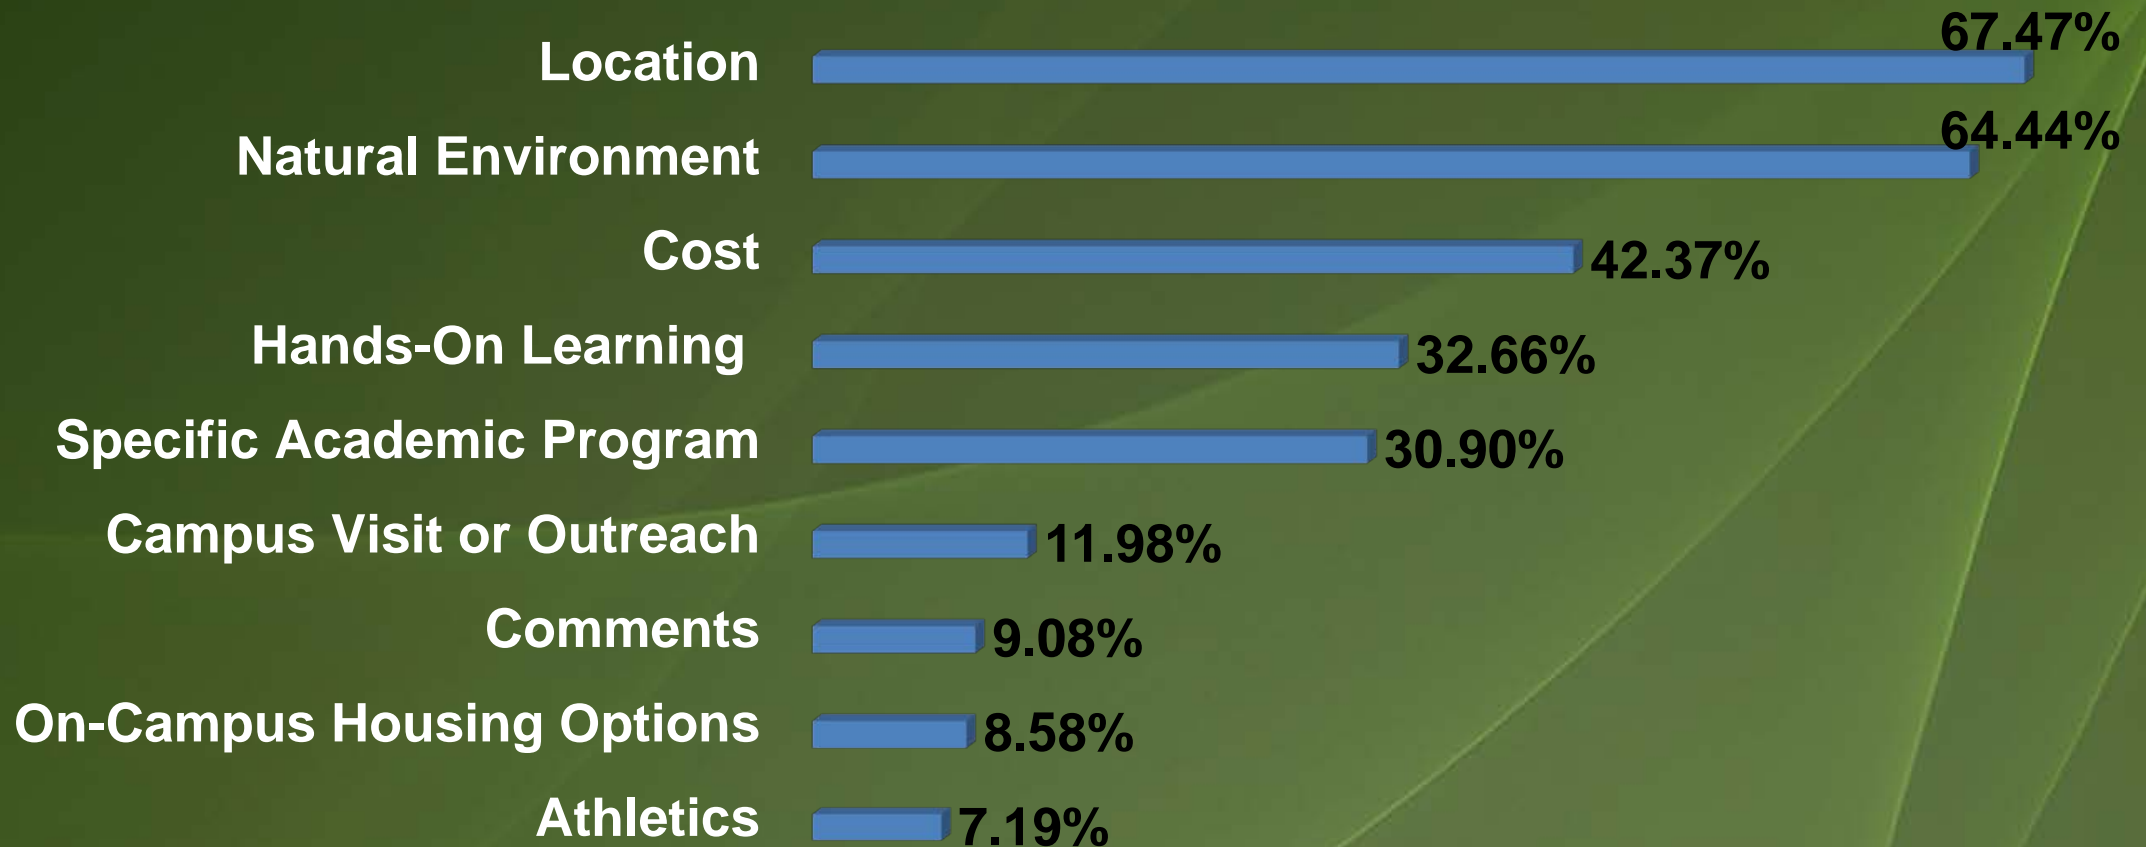

794 student responses = 61 percent response rate

I Statements

I Statements

Trends

Overall scores for program were high.

Responses from 'I Statements' show a high confidence from students.

Topics that are most immediately relevant received the highest marks.

The data supports that we are providing information at the right time.

Gaps

At the moment the survey is taken students are stating they feel ready.

We know, based on persistence and retention numbers, that this changes very quickly.

Topics that we perceive to be immediately important receive lower marks but have the highest impact.

If we look back, what's missing?

Looking Forward

Perhaps we need to think ahead to mid-semester assessment.

How do we enhance topics that are less effective?

Is the amount and type of programming truly effective?

Thank you!
